## Technician HVAC Survey

This survey determines the class topics needed for training

### Check list:

#### Check the tools that you own:

- R 22 manifold
- R 410A manifold
- Refrigerant hose control valves
- Ball valve core remover
- Vacuum pump
- Recovery machine
- Recovery tank
- Electronic leak detector
- Electronic thermometer
- Pocket digital thermometer
- Electronic charging scale
- VOM – Volt Ohm Multimeter
- Magnehelic gauge
- Draft/air gauge

### Questions – AC

- What two tools are used to check superheat and sub-cooling?

\_\_\_\_\_

- What tool is used to check ESP – External Static Pressure?

\_\_\_\_\_

### Questions – Heating

- What tool is used to check heat exchanger negative pressure and proving switch?

\_\_\_\_\_

- How many micro amps are considered a good and strong flame? \_\_\_\_\_

- What is the run time needed for checking temperature rise? \_\_\_\_\_

- What is the minimum gas supply pressure required? \_\_\_\_\_
